

**AMENDMENTS TO THE SPECIFICATION:**

Please add an abstract as follows:

Driving apparatus for a blast furnace charging distribution chute capable of uniformly distributing charging material. The driving apparatus for a blast furnace charging distribution chute includes a driving unit comprising a crankshaft connected to a motor to rotate with a variable rotational radius, a power transmission unit comprising a plurality of connection rods connected to the driving unit to linearly transmit power, and a working unit connected to the power transmission unit and fixed to circumference of a distribution chute to rotate or tilt the distribution chute.
